Adding 'Link in bio' to Instagram Posts

Screenshots included from Instagram

When posting to Instagram it is not possible to link to external sites in the post itself, so when you post, people often add to their caption - 'link in bio'

To start a new post, select + from the bottom of the screen, choose **Post**, upload an image from your camera roll and add the caption.

For example, if I wanted to share my latest blog post I would post something like the following:

Check out our latest blog post on why SEO should be a top priority for small businesses in 2024. Link in bio.

#digitalmarketing #seo #smallbusinessmarketing #smallbusinessmarketingtips

<	New post			
Check out our latest blog pest on why SEO should be a top priority for small businesses in 2024. Link in bio: demailbusinessmarketingtips				
ø	Tag people	>		
5	Add music	>		
п	Diferenças (feat. Adriana M 🕫 Enjoy (feat.	Sweech) · /		
٢	Tag products	>		
	Add reminder	>		
€	Audience Everyone	NEW >		
0	Add location	>		
ndon,	United Kingdom London, United Kingdom	Welling, Bo		
~7	Boost post			
	Share			

Now I click **Share** to post.

Next, I copy the link to the blog post by visiting the blog post.

Now I highlight the address and copy it.

Now, I go to my profile on Instagram and select Edit Profile

Select Links		
Links	1	>
Public business information	on	
Page	The Social Matrix Limited	>
Category		>
Select Add external link
